**YOUR BIGGEST INVESTMENT**

**MAY BE AT RISK**

**Don't let termites destroy your biggest investment. Protect your home with the Sentricon® System.**

Talk with your pest control technician, or call us today to have Sentricon — the No. 1 customer-preferred termite control product — installed and serviced on your property.

**How it works.**

As part of your service contract, your Alvin Pest Control technician...

1. Inspects your property for signs of termites

2. Places Sentricon stations containing Recruit® HD termite bait in the soil around your home

3. Recruit HD is immediately available to termites when they enter the station

4. Continues monitoring Sentricon stations as needed to protect against future infestations

**Easy to live with.**

To eliminate existing termite colonies or protect against invading colonies, Sentricon stations are placed in the soil around your home. This is much less disruptive to your family, buildings and landscaping than other termite treatments.

- No drilling in floors and foundations
- No extensive digging or trenching in the landscape and other areas around your home
- No chemical solution injected in the ground under and around your home
- No tank trucks of chemical solution
- No scheduling hassles

**Reliable, ongoing asset protection.**

The Sentricon® System with Always Active™ technology is available only from specially qualified Certified Sentricon Specialists™, like Alvin Pest Control, who are committed to protecting homes from destructive termites. We were selected by the manufacturer, Dow AgroSciences, from among the industry's best pest management professionals.

The constant presence of Sentricon, along with our professional attention, gives you and your family peace-of-mind protection.
